SUMMARY

Frontend engineer with experience building React and Next.js applications for healthcare and business platforms. Focused on maintainable UI architecture, complex forms, role-based access, and API-driven interfaces. Comfortable working with real-time data, changing requirements, and incomplete backend contracts while keeping user workflows clear and reliable.

Technical Skills

Frontend: React, Next.js, TypeScript, JavaScript, HTML5, CSS3, Redux, Material UI, SASS, Bootstrap

Tools: Git, Webpack, Vercel, JIRA, Postman, Node.js, WebSockets, Flutter

Architecture: Component design, state management, REST API integration, form validation, responsive UI, URL state handling

EXPERIENCE

Senior Frontend Developer · Fly Bird Tech

Nov 2020 – Present

- ▶ Built and maintained frontend applications using React, TypeScript, and Redux for production business platforms.
- ▶ Worked on dashboard and operational interfaces, including role-based access, multi-step forms, and data-heavy screens.
- ▶ Integrated frontend features with REST APIs and collaborated with backend teams to resolve contract mismatches and runtime data issues.
- ▶ Improved maintainability by creating reusable UI patterns and componentized frontend structures.
- ▶ Troubleshot production issues related to rendering, application state, API responses, and user workflow errors.
- ▶ Contributed to responsive and user-friendly interfaces in an Agile team environment.
- ▶ Converted Figma designs into responsive, functional frontend interfaces using React, Next.js, and TypeScript.
- ▶ Implemented design specifications into production-ready pages and workflows, ensuring UI fidelity, usability, and consistency across screens.
- ▶ Collaborated closely with designers and product stakeholders to translate mockups into working features and interactive user flows.
- ▶ Built reusable UI components and page structures that matched approved design systems while supporting real application logic and data integration.

Implementation & Technical Account Manager · InSource Asia

May 2018 – Apr 2020

- ▶ Managed technical implementation projects from onboarding through deployment and support.
- ▶ Worked directly with clients to understand requirements and translate business needs into technical solutions.
- ▶ Coordinated across product, sales, and development teams to deliver customer-facing solutions and training.
- ▶ Supported troubleshooting, onboarding, and technical communication for multiple client engagements.

Director of Information Technology · GNTravels

Nov 2016 – Jun 2018

- ▶ Managed IT operations, internal systems, and digital tools supporting business processes.
- ▶ Supported infrastructure improvements and operational technology decisions across the organization.

SELECTED PROJECTS

Healthcare Admin Platform

- ▶ Built and maintained a healthcare administration interface with React, Next.js, and TypeScript
- ▶ Implemented authentication and role-based access for distinct user types and operational workflows.
- ▶ Developed multi-step data-entry forms with validation and unsaved-change tracking.
- ▶ Coordinated server and client data and supported real-time updates across healthcare administration workflows.
- ▶ Integrated REST APIs and handled changing backend contracts while keeping the interface usable.

Healthcare Web Application

- ▶ Developed frontend features for healthcare workflows and user-facing screens
- ▶ Integrated backend services with clear loading, validation, and error states.
- ▶ Implemented form flows, state transitions, and dynamic UI behavior across a complex product.
- ▶ Maintained responsive layouts and reusable frontend patterns across multiple modules.

Elderly Care Monitoring System

- ▶ Built and maintained a Next.js and React platform for elder-care workflows, caregiver coordination, and health-record management.
- ▶ Implemented authentication and role-based access for caregiver and senior-nurse workflows.
- ▶ Developed elder registration and profile forms with validation, draft handling, URL state, and unsaved-change awareness.
- ▶ Integrated backend services for elder data, medical records, medication tracking, notifications, and emergency contacts.
- ▶ Worked with changing or incomplete API contracts while maintaining a stable, usable experience.
- ▶ Supported real-time updates and data-heavy workflows across multiple user roles.

EDUCATION

B.Sc. in Natural Resources Engineering (Ecology)

Arak University, Iran

2000 – 2005

Additional

- ▶ Frontend development experience since 2018.
- ▶ Experience with Flutter and basic Node.js.
- ▶ Comfortable working in production environments with changing requirements and incomplete backend contracts.
